

# CONFIRMED SPEAKER

## Dr Maasaki SAKURABA

October 2, 2017 - Jakarta, Indonesia

Principal researcher at the R&D Center of Nippon Koei Co., Ltd in Japan, Dr Sakuraba has over 25 years of professional experience in the field of disaster management and mitigation, especially in predicting and assessment of the risks of hydraulic disaster. He serves as Visiting Professor/ Lecturer for distinguished academic institutes such as IRIDeS in Tohoku University of Japan and AIT, Thailand. In addition to his academic activities, Dr Sakuraba has had assignments in the wide variety of infrastructure projects. One of the particular note is JICA assisted “Urgent Project for Rehabilitation of Yangon Port and Main Inland Water Transport from the Damages caused by the Cyclone Nargis 2008”.

### Attend

**Plenary 3 - Modelling and Digital Technology in Planning for Resilience**

**REGISTER NOW!**

### Professional background

**NIPPON KOEI**

▲ Visiting Professor, Tohoku University International Research Institute of Disaster Science (IRIDeS), Japan.

▲ Visiting Lecturer, Asian Institute of Technology (AIT), Thailand.

### Testimonial

“Modelling and digital technology such as BIM/CIM and VR/AR technology in planning resilient infrastructures is necessary to achieve the consulting service effectively. FIDIC Annual Conference is a good opportunity to expand your network among consulting engineers worldwide and to learn about wider range of engineering issues.”
