

# CONFIRMED SPEAKER

## Mr Franciscus SUPARTONO

October 3, 2017 - Jakarta, Indonesia

Franciscus is the CEO of PT. Tridi Membran and PT. Midasindo Teknik Utama in Jakarta as well as Consultant expert for the civil structural engineering work in Indonesia and abroad, especially for several large bridges projects including the conceptual design of Sunda Strait Bridge (main bridges of 2016m span & 1224m span and viaducts) that will link Jawa Island and Sumatra Island. He holds a Doctorate degree from the Ecole Centrale de Lyon, France, in the field of Concrete Damage Modeling and was awarded the Medal of Honor "Chevalier dans l'Ordre des Palmes Académiques" from the French Government in 2004.

### Professional background

### Publications

### Testimonial

▲ Associate Professor, Faculty of Engineering of Tarumanagara University

▲ Over 200 national and international scientific publications on High Performance / Sustainable Concrete Technology.

"The International Infrastructure Conference in Jakarta features discussions on how to improve the quality control and quality assurance of the engineering process; overall, an exciting event on a highly topical issue. It will no doubt improve the knowledge and value of our consulting services in the future, especially for the developing countries."

▲ Past Vice President of the Indonesian Society of Civil and Structural Engineers, HAKI

▲ Past Vice President of the Asian Concrete Federation
