

# CONFIRMED SPEAKER

## Mr Tom WILMS

October 3, 2017 - Jakarta, Indonesia

Tom holds a MSc. in Civil Engineering from Delft University of Technology, the Netherlands. He joined Witteveen+Bos in 2006, as an engineer in coastal and river projects and, over the years, worked in countries like Kazakhstan, Russia and Serbia on projects in the coastal zone and river basin. In the Netherlands, he was involved in the project Delfland Coast and the Building with Nature projects in the Lake IJssel as well as several sluices and locks. In 2014, Tom moved to Indonesia and has been working on a coastal restoration project in Central Java which focuses on restoring the mangrove coast with low tech structures and revitalising the aquaculture in the hinterland. The project received in 2016 the Dutch engineering award 'de Vernufteling'.»

*Plenary 7 - Designing Resilient Infrastructure*

**REGISTER NOW!**

### Professional background

- ▲ Project engineer at Witteveen+Bos
- ▲ Designer at MNO Vervat/ Boskalis Nederland

### Prizes

- ▲ Dutch Engineering Award 'de Vernufteling' in 2016 for the [Building With Nature](#) project in Central Java.

### Testimonial

"FIDIC's International Infrastructure Conference is a nice opportunity to catch up again with people and get connected. It is also a platform to share knowledge on resilient infrastructure and to learn from each other's experiences."
